

▶ TH801-Lite Conveyor Shrinkable Tuber, *lite edition*

- Basic model recommended for continuous mass shrinking production of splice wires. Comparing to classic TH801/802:
50% shorter, *35%* powerful, *30%* cheaper
- Conveyors continuously transport wires through heater and drop tube shrunk wires into collector after cooling
- Different heater sizes to choose from for tube variety
- Support wire diameter up to 10mm
- Options of side conveyor, ‘toothless’ main conveyor for very thin wires and ring terminal fixture etc.
- Serial link for data communications

SPECIFICATIONS

Size	1000Lx290Wx570H (mm)
Weight	50kg
Control	Trivers integrated control card
Tube Diameter	10mm max
Tube Length	45mm for standard 90mm heater
Heater Size	358x(60,90,120,160,200) mm Corresponding to tube max length (30,60,90,130,170) mm, respectively
Temperature Control	Max 550±1°C
Timer	0-999±0.1S
Option	RS485 serial link, custom tooling
Power Supply	220-240VAC 2.2kW, 3kW optional

about us

Trivers Shanghai, established in 2007 by Trivers Australia, has a series of over 10 products in robotic production lines & wire harness assembly automation backed by patents. It is an authorized supplier to several Fortune 500 companies, is an executive member of the Shanghai Robot Alliance, and is a key member of government R&D
