

▶ TR48-BJ-KDS Dual Station Tube Stripping Stranding

- The dual-station tube stripping stranding machine is mainly used in the automotive wiring harness industry, which performs ring cutting on the cable and twists out cables, effectively stripping the outer protective layer of the cable stands within.
- For different models and requirements, the stripping stranding machine parameters can be easily changed through the set by the HMI machine interface.

SPECIFICATIONS

Power voltage	380VAC/50Hz
Power	6.0KW
Air Supply	Purified compressed air after drying, pressure 0.6MPa or above

about us

Trivers Shanghai, established in 2007 by Trivers Australia, has a series of over 10 products in robotic production lines & wire harness assembly automation backed by patents. It is an authorized supplier to several Fortune 500 companies, is an executive member of the Shanghai Robot Alliance, and is a key member of government R&D projects.
