▶ TR48-CG-KDS Thick Tube Threading Machine

- The TR48-CG-KDS pipe threading machine is mainly used for a multi-strand wire harness with several meters in length. It can automatically put with a very tight wire casing greater than one meter in length. No lubrication is required, and the rest of the parts are automatically wrapped with tape.
- This equipment sets corresponding orders according to the size and length of the casing model.
- The operator only needs to operate the equipment and pick and place materials step by step according to the prompt of the operation light.
- Different casing styles can be configured by changing the position of the casing clamp.
- The control display shows real-time working conditions on processing progress, and that allows for processing parameters to be set.

SPECIFICATIONS

Main Station Size	1000W, 7000L, 1500H (mm)
Power Supply	AC220V, 50HZ
No. of housing that can be processed simultaneously	4 pieces
Cycle time	40s

about us

Trivers Shanghai, established in 2007 by Trivers Australia, has a series of over 10 products in robotic production lines & wire harness assembly automation backed by patents. It is an authorized supplier to several Fortune 500 companies, is an executive member of the Shanghai Robot Alliance, and is a key member of government R&D projects.
